PEAK FIELD PERFORMANCE

LIGHT OUTPUT

Both Luminaires are extremely efficient with light output being very even and with both units having the same **outstanding range of beam angles**.

While there is little difference between the two units in terms of power of output, **the P/Convex does have a more defined beam edge and it is also somewhat smoother in performance.**

CONSTRUCTION

These Luminaires are constructed using aluminum extrusions and high pressure die castings to provide robust performance and excellent heat dissipation characteristics. With recessed Slider Knobs these units are therefore ideally suited to heavy duty applications i.e. hiring or touring.

internal components being manufactured from Zinc Annealed Steel coated with high temperature heat resistant paint for superior corrosion resistance. All units are available

MAINTENANCE

Lampholders, Reflectors and Lenses are all accessible via quick access doors and sliding panels for fast, simple maintenance, while Sliding components are Teflon mounted for smooth, trouble-free operation.
