#### FEATURES

- Power Cut-off Micro Switch
- Spring Loaded Gel Frame & Barndoor Retention System with Lock-off facility provides absolute security and acts as a 4th leg when standing the Luminaire upright.
- Light Leak Integrity
- New Extruded Body Section & Castings for Improved strength and reduced weight makes this unit ideal for Hire and heavy usage situations.

#### PEAK FIELD PERFORMANCE

#### LIGHT OUTPUT

Both Luminaires are extremely efficient with light output being very even and with both units having the same **outstanding range of beam angles**.

While there is little difference between the two in terms of power of output, **the P/Convex does have a more defined beam edge and it is also somewhat smoother in distribution.**

#### MAINTENANCE

Lampholders, Reflectors and Lenses are all accessible via easily opened hinged doors for fast, simple maintenance, with absolutely no pop-rivets being used for fastening purposes. Slider systems are independent of the body structure ensuring trouble-free operation even if the body does sustain some dents or damage. Any component can be replaced within minutes.

#### PAINT

External paint is heat and scratch resistant Powder Coat, with internal components being manufactured from Zinc Annealed Steel coated with high temperature heat resistant paint for superior corrosion resistance.
