### PEAK FIELD PERFORMANCE

#### LIGHT OUTPUT

Both Luminaires are extremely efficient with light output being very even and with both units having the same **outstanding range of beam angles**.

The P/Convex unit has a more intense narrow angle output combined with a **more defined beam edge at all beam angles** and a **generally smoother light distribution**.

#### CONSTRUCTION

These Luminaires are constructed using aluminum extrusions and high pressure die castings to provide robust performance and excellent heat dissipation characteristics. With recessed Slider Knobs these units are therefore ideally suited to heavy duty applications i.e. hiring or touring.

#### MAINTENANCE

Lampholders, Reflectors and Lenses are all accessible via quick access doors and sliding panels for fast, simple maintenance, while Sliding components are Teflon mounted for smooth, trouble-free operation.

#### PAINT

External paint is heat and scratch resistant Powder Coat, with internal components being manufactured from Zinc Annealed Steel coated with high temperature heat resistant paint for superior corrosion resistance. All units are available in a wide range of colors.

#### INCLUSIVE ACCESSORIES

Safety Cable, Gel Frame,  
& Plug Adaptor
